[REDACTED] mentioning [REDACTED] together with LEO, it is reasonable to assume that the subject was among those in attendance at this meeting since it has been reported from several sources that he was there and managed to evade detection by the police. It is also to be noted that an additional note found in TORNABE's possession mentioned the name ACQUA-VELVA, which could be assumed to be a phoenetic variation of the then current alias used by the subject, ACQUAVELA.
